Just Click on any of the pictures to find out more and how you can get your New SatNav.... !!!! Whether its a TomTom , Garmin , Navman or Binatone , we have hundreds available. **BLUE BADGE SAT NAV AVAILABLE!!!!** Navevo BBN100 Satellite Navigation System for Blue Badge Holders **CLICK HERE TO BUY OR FOR MORE INFORMATION** Blue Badge Sat Nav Designed to Support Disabled Drivers BBNav is the first dedicated Blue Badge sat-nav solution specifically designed to support disabled drivers and those caring for the disabled, such as their families or carers. BBNav includes all of the features found on a standard sat-nav but has been enhanced to provide detailed information to support Blue Badge holders. **Blue Badge On-Street Parking Database** BBNav features the most comprehensive database of Blue Badge on-street parking available. This also allows you to locate and navigate directly to over 10,000 on street parking bays, including Blue Badge and Red Route bays. This unique feature can save not only time but can also take out the uncertainty when driving around and searching for a car parking space. Clear colour-coded and numbered icons are displayed on the mapping while driving and you can easily search for a car park/parking bay of choice and navigate directly to it, as well as understand the waiting times or any restrictions. **Blue Badge Disabled Access Car park Database** BBNav also includes a database of over 3,500 disabled access car parks. To ensure you can find the right type of car park for your specific needs, most are graded from 1 to 3: Grade 1 being suitable for wheelchair users traveling independently; Grade 2 for wheelchair users traveling with assistance and Grade 3 for wheelchair users or those with some degree of mobility, able to walk a limited distance. BBNav also provides information about any height restrictions above 2.2 meters, which can be extremely useful if you are driving a converted vehicle for example. **Blue Badge Local Council Parking Rules** In addition, BBNav's mapping has been uniquely colour coded to clearly show the rules that the local councils apply for Blue Badge holders, so users can easily identify whether they can park legally on yellow lines, pay & display or in residents' bays. **Points of Interest Data** In addition to the standard 40,000 NAVTEQ UK points of interest, BBNav also offers a further database of over 20,000 POI's tailored specifically for people with disabilities making it the perfect travel companion. If you are visiting an unfamiliar town for a day trip, BBNav will tell you where you can park, where the public toilets with disabled facilities are and will even point out the nearest shopmobility scheme should you want to take a powered scooter or wheelchair to see the local attractions in greater detail. BBNav's POI data displays the disabled access type and contact telephone numbers making it easier than ever to plan a stress free trip and if you fancy taking a detour, you have the freedom to do so with the knowledge that BBNav will be able to offer invaluable and vital information to make the trip so much easier. **Comprehensive Coverage** BBNav assists Blue Badge holders in finding suitable parking locations and points of interest in over 150 major cities and towns across the UK including all of the London boroughs, providing users with greater flexibility and choice when shopping, driving into town or just going out for the day. **TO BUY THIS OR ANY OTHER SAT NAV SYSTEM CLICK HERE**
